Safety Precautions

- Wear the watch approximately one finger's width above your wrist bone and ensure a snug, comfortable fit. If the watch is worn too loosely or during vigorous activity, heart-rate measurements may be affected.
- The watch has a water-resistance rating of 5ATM (equivalent to a static water depth of 50 meters for 10 minutes). It can be worn in swimming pools, when swimming near the shore, or during other shallow-water activities. It is not suitable for diving, scuba diving, hot showers, hot springs, saunas, high-speed water flow, or other water-related or deep-water activities. After exposure to seawater, rinse the watch gently with clean water and wipe it dry. Leather, metal, or woven straps should be dried immediately after getting wet (avoid direct sunlight or high heat). Water resistance is not permanent and may degrade over time.
- The touchscreen does not support underwater operation. After the watch contacts water, wipe off excess moisture with a soft cloth before use.

- During daily use, avoid wearing the watch too tightly. Keep the contact area dry; clean the strap regularly with water and dry it thoroughly. If redness or swelling occurs, stop using the watch and consult a doctor.
- Keep the power adapter, charging cable, and watch dry while charging. Do not touch them with wet hands or expose them to rain or liquids.
- If the watch will not be used for an extended period, fully charge it, power it off, and store it in a cool, dry place. Recharge at least once every 3 months.
- The watch operates between -10 °C and 45 °C; use outside this range may cause malfunction.
- If the screen is broken, do not touch or attempt to remove it. Stop using the watch and contact an authorized service provider.
- Use the included charging Dock. Use only power adapters that meet local safety standards or are certified and supplied by qualified manufacturers.
- The product contains a built-in, non-removable lithium battery. Do not replace the battery yourself. To avoid damage to the battery or the product, do not disassemble or modify the battery or the device. Battery replacement must be performed by an authorized service center. If the battery is swollen, stop using the product immediately. Do not dispose of used batteries in household waste or landfills; dispose of this product and its used batteries in accordance with local laws and regulations.
- Replacement of a battery with an incorrect type that can defeat a safeguard.
- Do not disassemble, strike, crush, or throw the battery into fire. Do not expose the battery to sunlight, fire, or environments with extreme temperatures.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an

explosion.

- Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas
- A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
- This product is not a toy and contains small parts. Please keep it out of reach of children to prevent choking or other injuries caused by accidental swallowing of small parts.
- Do not direct the product's indicator light toward the eyes of children or animals while the product is in use.
